The Diversity Center of Northeast Ohio has been dedicated to eliminating bias, bigotry, and racism since 1927.

Our programs work to build inclusive school environments that promote acceptance and mutual respect. Each year, thousands of students learn how to become leaders and positive change-agents in their schools and communities by participating in our camps, conferences, and retreats.

Together we can create communities where all people are connected, respected, and valued.

## 2019 Fall High School Retreat

The Diversity Center of Northeast Ohio's annual Fall High School Retreat is a unique, three-day opportunity for students and educators of all backgrounds, throughout Northeast Ohio, to come together to explore topics of social justice and diversity.

At this year's retreat entitled, "Social Justice: Youth Voices and Social Change", students will engage in dialogue that will give them the ability to recognize the importance of their voices. From educating themselves on the history of current issues impacting our society, to learning critical skills that could help usher potential change within their communities, the students can begin to identify how to harness the power of their voices. Students will also have the opportunity to participate in exercises that focus on building trust, improving their ability to communicate, engaging in problem solving, and developing a plan with moving parts.

Whether as an individual or as a collective group, we want the students to leave the retreat having the courage not only to speak for themselves and others, but to sound the calls to action that can foster effective societal change and combat the injustices they experience or see daily.

**Plan on  
joining us  
this year!**
